Q1 CEO Report

November 17, 2023

The Honorable Henry D. McMaster, Governor
Members of the State Fiscal Accountability Authority
Members of the General Assembly

RE: 2022-2023 Annual Investment Report

Dear Ladies and Gentlemen:

The Retirement System Investment Commission is pleased to provide the following annual report on the Retirement System's investment portfolio performance.

For fiscal year 2022-2023, the fund returned 6.83 percent with trailing 3-, 5-, and 10-year returns of 10.79 percent, 7.19 percent, and 7.11 percent respectively. The fund began the year with a market value of \$38.3 billion and ended the fiscal year at \$40.6 billion, which includes the impact of \$266 million in net negative benefit payments, which was offset by \$2.6 billion in positive investment performance.

We were pleased to see the fund's one-year performance return to positive territory this fiscal year after a slightly negative return in fiscal year 2022. This was largely the result of a recovery in Public Equity, which represented 44.3 percent of the portfolio and returned 16.59 percent after being down 16.12 percent the year before. Private Debt was our second-best performing asset class in absolute return with a 5.66 percent return, exceeding its portfolio benchmark by 1.62 percent. All of our asset classes, with the exception of Bonds, outperformed their respective benchmarks, which led to the portfolio exceeding the total fund policy benchmark by 1.33 percent, which amounts to \$518.2 million in excess return. This year's out performance contributed to the portfolio exceeding the policy benchmark for all reported periods, with a three-year outperformance of 2.96 percent, which amounts to \$3.3 billion in excess return over the benchmark for the time-period.

However, as long-term investors, we remain conscious that one year's investment performance does not define the success of our program. Thus, we are encouraged to see that this year's performance contributed to the longer trailing 3-, 5-, and 10-year returns exceeding the 7 percent assumed rate of return. As we continue to navigate the market

volatility associated with a higher interest rate environment than we have experienced since before the Great Financial Crisis, we believe that a steadfast focus on a long-term investment horizon provides the best opportunity for success.

For RSIC, our mission is clear – earn an investment return that helps fulfill the State's sacred promise of benefits to our retirees, made in exchange for a lifetime of public service. As always, we appreciate the faith and trust the State places in us to fulfill this mission and believe that we are best positioned to meet the challenges ahead.

Sincerely,

A handwritten signature in blue ink, appearing to read "Michael Hitchcock".

RE: Fiscal Year Ending June 30, 2023 Review

Verus serves as the general investment consultant to the South Carolina Retirement System Investment Commission (RSIC) and is pleased to provide an overview of the market environment and a summary of performance for the fiscal year ended June 30, 2023.

Review of Fiscal Year 2023

The fiscal year started out on difficult footing. The broad market selloff that started in the first half of 2022 increased in intensity as global central banks hiked interest rates, effectively withdrawing liquidity from the financial system. U.S. headline inflation (which includes all prices) began to show signs of slowing but continued to remain high at 8.2% year-over-year as of the end of September 2022. Additionally, treasury yields increased materially, with the 10-year yield rising from 2.89% to 3.83% as the Federal Reserve reaffirmed its aggressive stance and markets questioned whether interest rates might be held at higher levels for longer than previously anticipated. Given these conditions, risk assets and fixed income asset markets were down in the first quarter of the fiscal year (July 1 – September 30, 2022), with public global equity markets falling -6.8% and core fixed income market returns returning -5%.

But conditions started improving near the end of 2022 as inflation fears began to abate as price levels demonstrated moderation. Headline inflation landed at 6.5% year-over-year in December, the lowest since October 2021. This led to market expectations for the Fed to potentially ease their tightening cycle and mitigate investor concerns of a near-term cyclical downturn. Additionally, China's rapid pivot away from a "Zero Covid" policy towards the end of Q4 added a large tailwind to the global growth outlook. Thus, risk assets posted their only positive quarter in 2022 in strong fashion, with global equities up +10% in Q4. Fixed income markets also produced positive returns as well, with the core fixed income part of the market up 1.9% in Q4.

Flipping the calendar to 2023, risk assets continued to deliver a strong start, building off the positive momentum seen towards the end of 2022. Falling headline inflation, a resilient labor market, and the first rate pause from the Federal Reserve all contributed to a more positive macroeconomic outlook, and overall sentiment eased considerably as the prospect of a "soft-landing" was revived. Global equities delivered another strong quarter in Q1 2023, up 7.3%.

Growth stocks reemerged and again delivered strong performance in the first quarter, led by the information technology sector.

In the final quarter of the fiscal year global equities persisted in their upward trajectory, with global public equities up +6.2%, as a surge in AI-focused hype help driving an expansion in the valuations of large tech firms. On the fixed income side, the Fed implemented an additional rate hike in the quarter which brought the Fed Funds rates to a level of 5.00–5.25% at the end of the fiscal year. The 10-year U.S. Treasury yield increased during the quarter from 3.48% to 3.81%, reversing the decline experienced during Q1.

Overall for the full fiscal year, public equity markets ended the period with very strong returns, with global public equities producing a return of +16.5% for the fiscal year. US Equity, represented by the Russell 3000 index, led the way up 19% in FY 2023. The growth side of the market was the main driver (up 27%), which significantly outpaced value stocks (up 11.5%) over the 1-year period. In international equity markets, developed market stocks (represented by the MSCI EAFE index) were up 18.8% for the fiscal year, while emerging market stocks (represented by the MSCI EM index) were up only 1.8%.

In fixed income markets, the overall core fixed income market (Bloomberg U.S. Aggregate index) produced negative returns, coming in at -0.9% for the fiscal year. This was largely driven by treasuries, which dropped -2.1% over the year as yields rose. Riskier credits performed well over the course of the year as credit spreads stayed surprisingly tight. To quantify, high yield bonds (Bloomberg US Corporate HY index) were up 9.1% in FY 2023, bank loans (S&P/LSTA Leveraged Loan index) up 10.7%, and Emerging Market Debt (JPM GBI-EM Global Diversified Index) up 11.4%.

Outlook

Despite the strong first half of calendar 2023, challenges remain going forward.

- Inflation is still a concern within the U.S. The Federal Reserve continues to face difficult policy decisions as inflation, while lower, sits above the two-percent target and economic and labor market strength persists. The FOMC briefly paused rate hikes in June only to further hike the benchmark rate again in July, and then pause again in September. Markets are pricing as many as two additional hikes before the end of the current tightening cycle, and sentiment is now turning to rates staying higher for longer.
- While strong asset performance has boosted investor sentiment, risks including regional banks, commercial office real estate, and sticker inflation remain. It is important to remember that rising interest rates tend to impact the economy *with a lag*. We believe many effects of interest rate rises have yet to be felt, and that the economy and markets may feel some pain by early 2024.

- Overseas, growth in advanced economies remains stunted as many central banks continue their battle against inflation. We believe growth will continue to face headwinds until inflation is under control, but for the moment, these markets have shown greater resilience than expected.
- Within emerging markets, the loudest narrative has centered on China. Reopening after the pandemic provided a material boost to activity, though positive momentum has been overshadowed by mounting geopolitical tension with the United States, a lack of broader accommodative stimulus from Beijing, and a hobbling real estate market.

South Carolina Retirement System Investment Results

As of June 30, 2023, the South Carolina Retirement System portfolio totaled \$40.6 billion, an increase of roughly \$2.3 billion from June 30, 2022. The portfolio generated a net return of 6.8% for the fiscal year, outperforming the policy benchmark return of 5.5%. The portfolio remains ahead of its benchmark for the trailing 1, 3, 5, and 10-year periods as of June 30, 2023.

The portfolio's asset allocation as of fiscal year-end is provided in the following table. Each asset class, with the exception of private equity, is consistent with the policy target and ranges set forth in the Annual Investment Plan and in the Statement of Investment Objectives and Policy. The current range for private equity is 5% - 13%, thus the asset class is slightly overweight.

Asset Class	% of Total System (Net) as of	
	June 30, 2023	Target Allocation (%)
Public Equity	44.3	46.0
Bonds	20.6	26.0
Private Equity	13.6	9.0
Private Debt	9.0	7.0
Real Assets	12.5	12.0
Total	100.0	100.0

03 Overview

Purpose & Duties

The South Carolina Retirement System Investment Commission (RSIC) is an independent agency of the State, responsible for investing the assets held in trust for South Carolina's public pension. There are five defined benefit plans that comprise the public pension. Collectively, the defined benefit plans are referred to as the "Retirement System" or the "Systems". The defined benefit plans are:

- South Carolina Retirement System (SCRS)
- Police Officers Retirement System (PORS)
- Judges and Solicitors Retirement System (JSRS)
- General Assembly Retirement System (GARS)
- South Carolina National Guard Retirement System Plan (SCNG Plan)

The assets of the Retirement System are invested in conformity with the requirements of South Carolina law. The law requires the RSIC to make investment decisions and conduct every aspect of its operations in the best financial interest of the trust.

The RSIC's long-term goal is to provide cost-effective management of the funds held in trust. This is achieved through a highly diversified portfolio designed to achieve an optimum investment return, balanced with a prudent level of portfolio risk. The RSIC's investments

are managed by its own professional staff and outside management firms.

The RSIC is governed by eight commissioners; six appointed members, one elected member, and one ex officio non-voting member. As of Fiscal Year End 2023, members of the RSIC Commission ("Commission") are: William H. (Bill) Hancock, CPA, Chairman; Edward Giobbe, MBA; Reynolds Williams, J.D., CFP; Melissa B. (Missy) Schumpert, CPA; William J. (Bill) Condon, Jr., J.D., M.A., CPA; Kenneth D. Deon, CPA; Holley H. Ulbrich, PH.D; and Peggy G. Boykin, CPA..

History

The RSIC was created under the State Retirement System Preservation and Investment Reform Act (Act 153). In October 2005, the Commission was established and devolved fiduciary responsibility for all investments of the Retirement System upon the RSIC. Act 153 also mandated that equity investments cannot exceed 70% (formerly 40%) of the Total Plan Portfolio (Portfolio) and created the position of Chief Investment Officer.

The assets of the Retirement System had historically been invested only in fixed income investments until a constitutional amendment was ratified in 1997. The amendment allowed the RSIC to invest in “equity securities of a corporation within the United States that is registered on a national securities exchange as provided in the Securities Exchange Act of 1934, or a successor act, or quoted through the National Association of Securities Dealers Automatic Quotation System, or a similar service” (SC Constitution Article X, §16). The Retirement System began investing in equities in June 1999; although, full diversification of the Portfolio remained constrained by the State Constitution. In November 2006, a constitutional amendment allowing for full diversification of the Retirement System’s Portfolio was approved in a statewide referendum and subsequently ratified by the Legislature in February 2007.

The Retirement Funding and Administration Act of 2017 expanded the Commission to 8 members and allows for delegation to the CIO under the direct oversight of the CEO the authority to invest up to 2% of the assets of each investment. It also prohibits the use of placement agents, defines the custodian of the Retirement System as the South Carolina Public Employee Benefit Authority (PEBA), and assigns the choice of the custodial bank to RSIC.

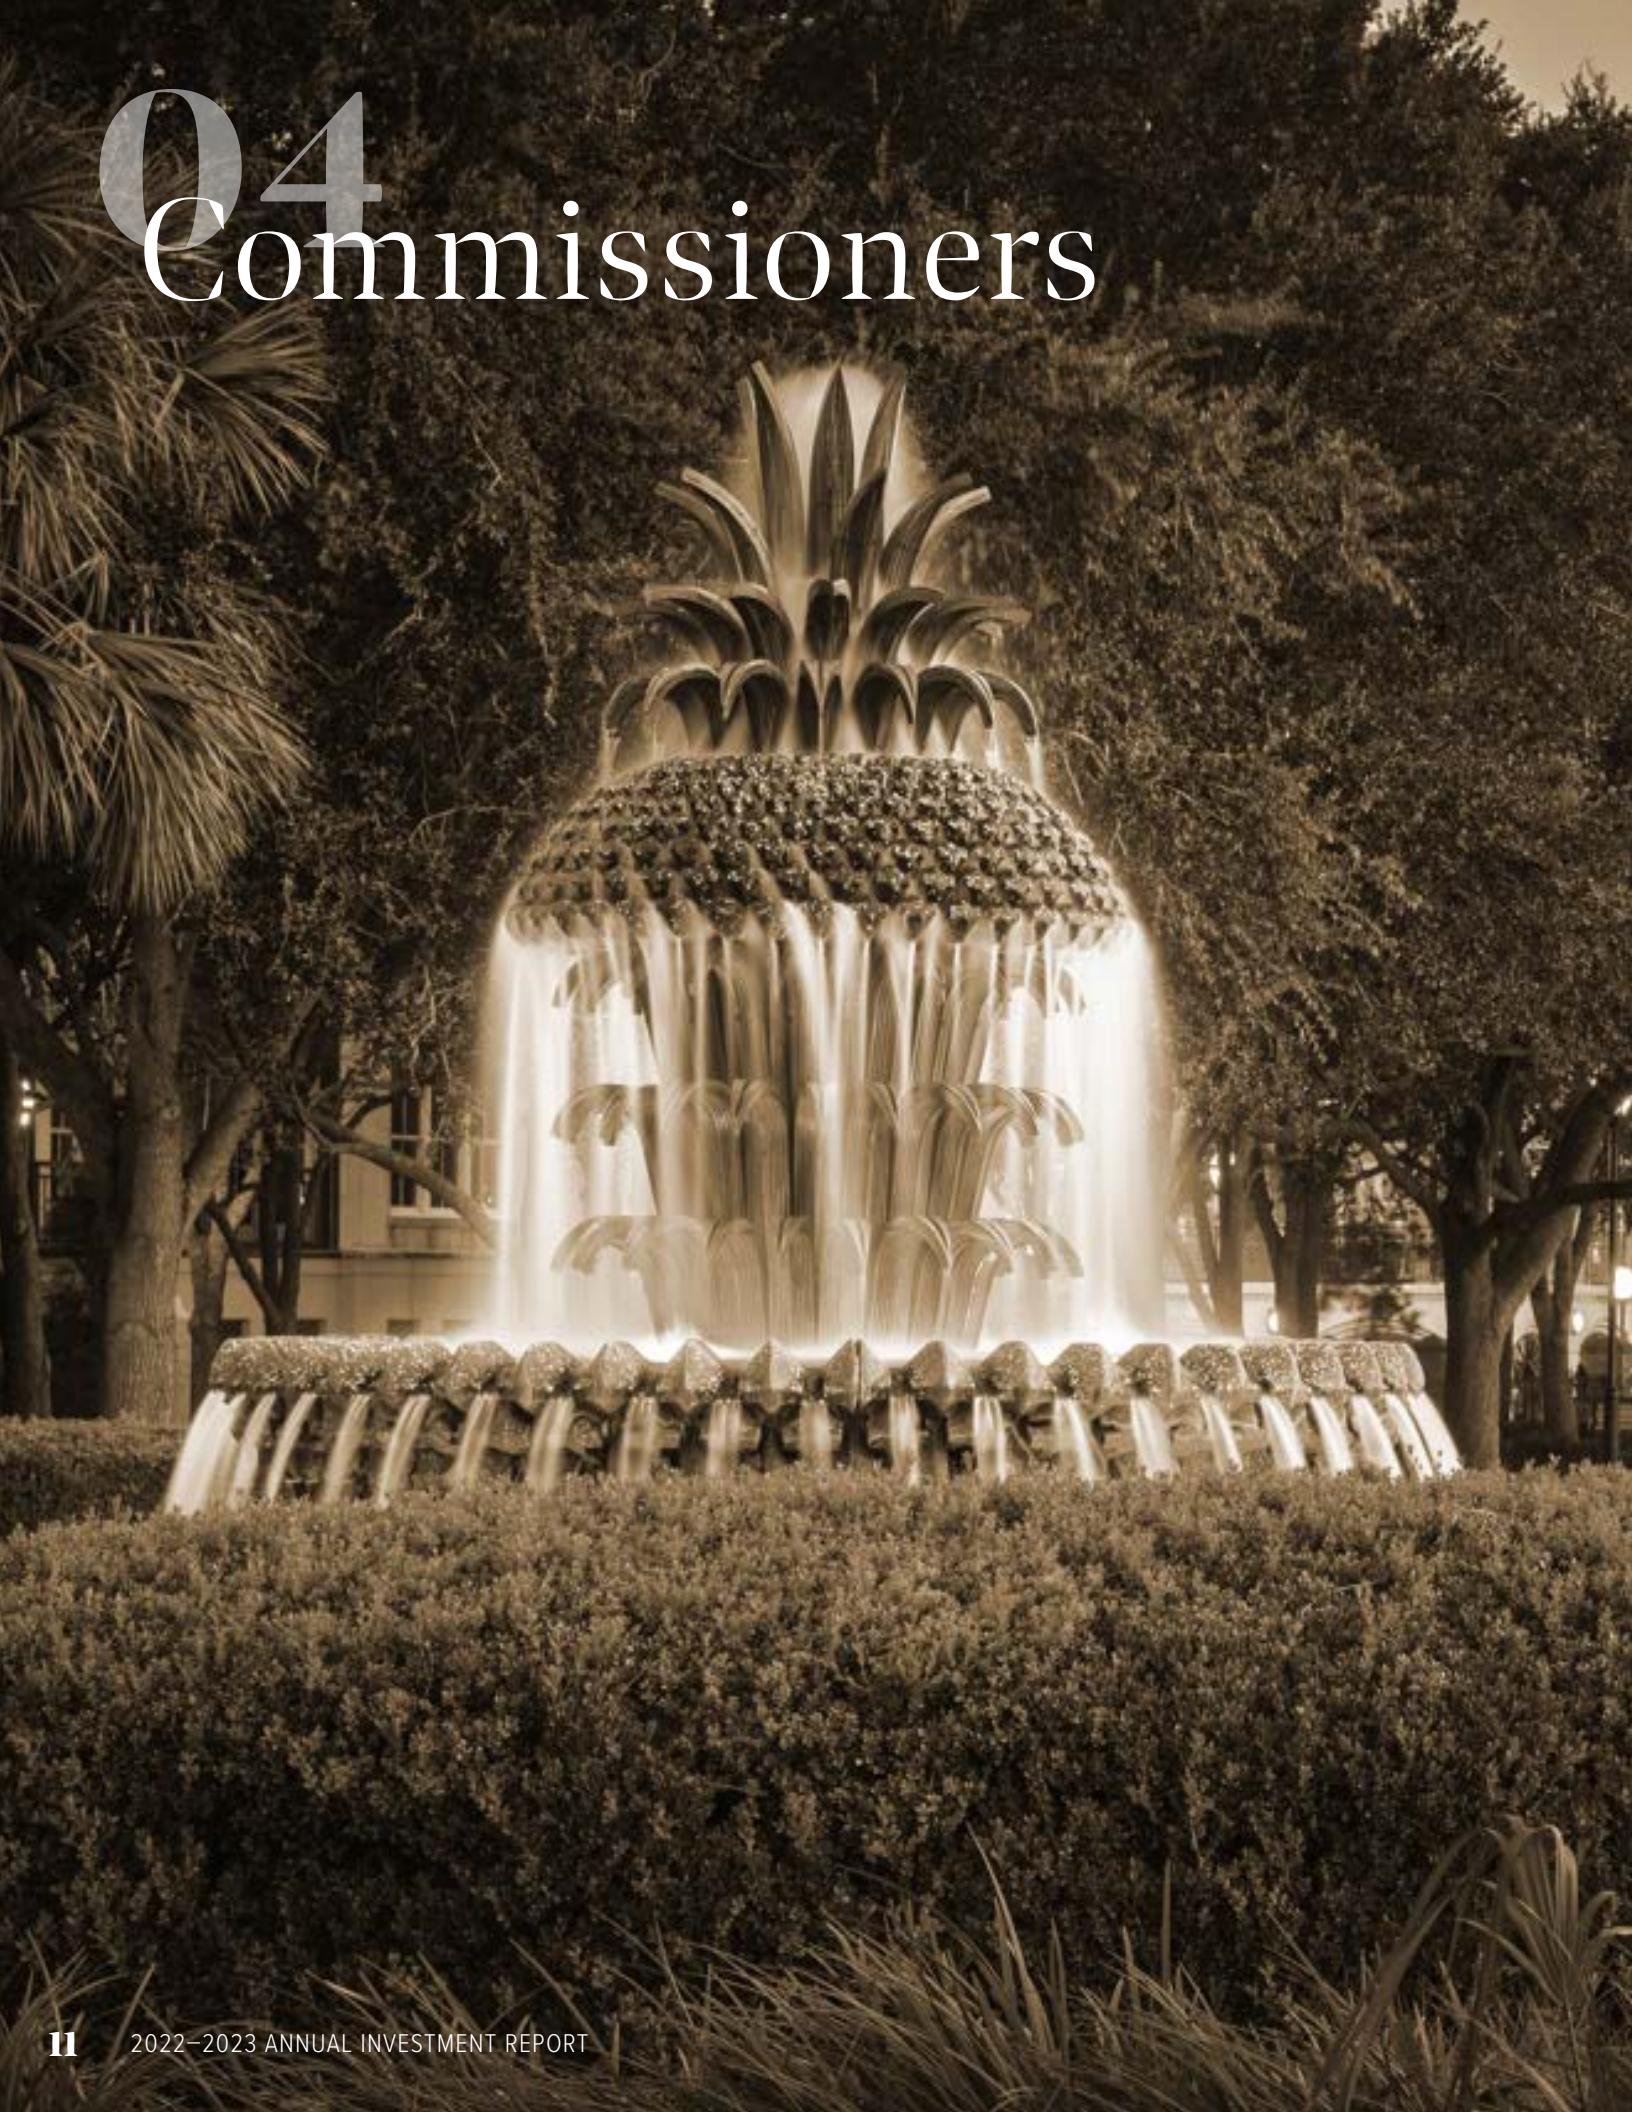

Disclosure of Material Interest

As of June 30, 2023, there was no material interest noted by the Commission or an employee who is a fiduciary with respect to investment and management of assets of the Retirement System, or by a related person, in a material transaction with the Retirement System within the last three years nor in any proposed material transaction of the Retirement System.

Placement Agent

All investments approved and closed during FYE 2023 follow the RSIC’s Placement Agent Policy (“Policy”). The Policy requires representation by the investment manager that no compensation was paid to a placement agent (as defined by State law) as a result of an investment by the Retirement System. During FYE 2023, all Policy-required disclosures by new investment managers indicated that no compensation was paid to a placement agent in connection with the RSIC’s investment.

Q5 Policy Allocation

POLICY

The Commission manages the Systems' assets with a long-term horizon and seeks to earn an appropriate risk-adjusted return with consideration to the goals and circumstances of the Systems and in the exclusive interest of the members and beneficiaries. Among the decisions the Commission can make, asset allocation has the most significant impact on the portfolio's return, risk profile, and cost and is reviewed annually as part of the development of the Annual Investment Plan (AIP).

Based on the Commission's determination of the appropriate risk tolerance for the Portfolio and its long-term return expectations, it has authorized the following Policy Asset Allocation. This includes target allocations and ranges for each asset class that were adopted by the Commission for the 2022-2023 Fiscal Year.

Asset Class	Policy Targets	Policy Range		Policy Benchmark

¹ Plan returns are from BNY Mellon and are time-weighted, total return, net of fees and expenses, and expressed in USD. Periods greater than one year are annualized. Returns generated from synthetic exposure through the Overlay Program are reflected in the Total Plan return but are not included in the asset class segment returns.

² The Policy Benchmark is calculated quarterly using a blend of asset class policy benchmarks and the policy weights for the respective asset classes. Prior to 12/31/2020 the Policy Benchmark was calculated monthly. The Policy Benchmark is set annually by the RSIC and has changed over time. The presented returns are a blend of previous policies.

³ Due to portfolio restructuring some investments may still show history attributed to former asset class.

⁹Benchmarks displayed in this report represent current policy benchmarks as of the SIOP effective 7/1/2020. Asset class benchmarks and policy weights are reviewed annually by the Commission's consultant and adopted by the Commission and have changed over time. The asset class policy benchmark return history represents a blend of these past policies.

¹⁰Hedge Funds Portable Alpha reported as gross exposure but, as collateral support to the overlay program, net to zero when calculating the total plan.

¹¹Russell Overlay reflects gain, loss and cash of overlay program. Portable Alpha hedge funds, short duration, and a portion of cash are held in the portfolio as collateral for the total notional value of the overlay program. Their total market values are displayed in this report.

Q7 Securities Lending

PORTRFOLIO STRUCTURE

The Portfolio currently participates in a securities lending program, managed by BNYMellon, whereby securities are loaned for the purpose of generating additional income. BNYMellon is responsible for making loans of securities to various broker-dealers and collecting cash and non-cash collateral. If the collateral value falls below a predetermined level, the borrower must post additional collateral. The cash collateral is invested in short duration securities and monitored on an ongoing basis. In conjunction with generating revenue, the collateral pool seeks to maintain a net asset value (NAV) of \$1.00, which is determined by dividing the market value of the assets by the cost of those assets.

PORTRFOLIO DEVELOPMENTS

The Securities Lending Program continues to employ very conservative guidelines on both the lending and reinvestment transaction. The reinvestment of the cash collateral is restricted to short duration, very low risk securities. The gross securities lending revenue for the fiscal year was approximately \$656 thousand, a decrease from \$1.5 million in the prior year.

On June 30, 2023, the NAV of the collateral pool was \$0.04. The market value of the collateral pool was approximately \$1.7 million, with an amortized cost of approximately \$46.3 million.

Q8 Expenses

OVERVIEW

For fiscal year 2023, total investment and administrative expenses decreased by \$257.5 million to \$449.5 million. As a percent of total assets, total expenses decreased to 1.11% of Total Plan Assets. Investment management fees and expenses for fiscal year 2023 decreased by \$263.2 million to \$433.0 million. Although performance for the total Plan was positive for fiscal year 2023, asset classes that incur performance fees generally had negative returns, which reduced performance fees, driving total fees lower as compared to the previous fiscal year. Bank Fees and Investment Expense, which are associated with custodied accounts and primarily consist of commissions on futures contracts and bank fees, were \$2.8 million. Investment expenses are reduced by tax distributions that offset tax expenses, some of which may have occurred in previous periods. The tax distributions in 2023 were not material. General administrative expenses increased by \$1.5 million to \$13.7 million.

Brokerage fees are broken out separately as commissions paid to brokers and are considered a part of the investment cost basis. Therefore, they are not included in the reported investment management expenses.

Investment management fees and expenses generally consist of three categories: investment management fees, performance fees including carried interest allocation (both realized and accrued), and other investing expenses, such as organizational costs in limited partnership structures. Investment management fees are generally a percentage fee based on the assets under management and paid to the manager of the

fund for providing the service of investing the assets. Investment management fees are reported net of offsets, which has the effect of reducing this total. Performance fees, including carried interest allocation, are a share of the profits from an investment or fund and is paid to the investment manager to create an alignment of interests. Performance fees accrued but not yet paid are included in this total.

Investment management fees and expenses are either paid by invoice or netted from investment assets. Under Governmental Accounting Standards Board (GASB) accounting guidance, “Investment-related costs should be reported as investment expense if they are separable from (a) investment income and (b) the administrative expense of the pension plan.” *The RSIC makes a good faith attempt to disaggregate netted fee amounts that are not necessarily readily separable from investment income. The RSIC oversees the third-party collection and aggregation of the netted investment fees and checks for reasonableness in order to disclose fees that would not otherwise be disclosed. In order to compare investment expense as reported by the RSIC with investment management costs reported by other public pension plans, an understanding of the actual fees and expenses included in any comparative reports is necessary. Additionally, investment plan composition directly influences the fee structure of a plan, and adjustments for differences in plan asset allocation are necessary before conclusions can be reached from such comparisons.

¹ Includes miscellaneous investment expenses, commissions on futures, and bank fees but excludes RSIC administrative costs in the form of transfers to RSIC in the amount of \$11.5 million.

Investment expenses are reduced by tax distributions that offset tax expenses, some of which may have occurred in previous periods. The tax distributions in 2023 were de minimis.

² Represents RSIC's actual expenses which equal transfers to RSIC less net change in RSIC cash on hand.

³ Fees from certain asset classes are captured on a lagged basis aligning investment costs with the reported net asset value and performance calculation. Fees were not lagged for these asset classes prior to fiscal year 2023.

09 Delegation Authority

INVESTMENT AUTHORITY DELEGATION

Pursuant to Section 9-16-330(B) of the 1976 South Carolina Code of Laws, the Commission delegates to the Chief Investment Officer the final authority to invest subject to the oversight of the Chief Executive Officer and the requirements and limitations of the Investment Authority Delegation Policy. Investment Authority Delegation allows the RSIC to make investments without requiring prior approval of the Commission provided the investment process adheres to the RSIC's Due Diligence Guidelines and Policies. The investment process for any investment made pursuant to this policy must be substantially similar to the investment process employed prior to the adoption of this policy except

for the requirement that the Commission approve the investment prior to the closing of the investment. The size of an individual investment made pursuant to the policy is subject to specific limitations provided for the asset class applicable to the investment. An investment can be made pursuant to this policy if it a) is not the initial investment in a new asset class, b) the majority of the underlying assets comprising the investment have been previously included in the investment portfolio, and c) the strategy to be employed by the investment manager is substantially similar to an investment that has been previously subject to the Commission's investment due diligence process.

¹Represents the date on which the RSIC executed the contracts and not the date the investment was funded.

²Returns are time-weighted, total return calculations, net of fees and expenses. All returns are expressed in U.S. Dollars. Periods greater than one year are annualized. Additional performance information can be found in the Manager Returns section of this report. Time-weighted methodology may not be an appropriate performance measure for private markets investments. Zero performance indicates no mark-to-market valuations have been received as of fiscal year end.

³Total fees are for the fiscal year and include management fees, performance fees including accrued carried interest, and other expenses.

⁴Performance inception begins with the first full month of performance. "n/a" signifies no full month of performance prior to fiscal year end.

⁵Negative NAV reflects valuations where the general partner has made investments and/or incurred expenses but has not yet called capital from limited partners.

Amounts expressed in thousands and thus may not add up to totals due to rounding.

10 Risk

OVERVIEW

The Commission will fulfill its fiduciary responsibility by prudently managing the assets held in trust for the sole benefit of the participants and beneficiaries of the Systems. It will seek superior long-term investment results at a reasonable level of risk.

The RSIC invests the assets of the trust to earn the required rate of return (7.0 percent as of fiscal year end) over time. In order to achieve this goal, an investor is required to expose his or her assets to risk. Instead of pooling one's risk, a prudent investor seeks to balance his or her risks to reduce the risk of severe loss. This principle of diversification is central to the RSIC's portfolio asset allocation.

The RSIC also believes that over time, an investor earns a return that is commensurate with the level of risk taken. Risk, in this sense, is a term that refers broadly to an investment's risk of loss. The RSIC typically uses the standard deviation of returns in order to quantify this economic risk of an asset, strategy, asset class, or the broad portfolio. However, there are other risks that are much more difficult to measure (and therefore, mitigate). The RSIC believes risks can be reduced through diversification, a strong due diligence process, ongoing monitoring, and risk management. Some examples of these risks include:

CONCENTRATION OF CREDIT RISK - INVESTMENTS

Concentration of credit risk is the risk of loss attributed to the magnitude of investment in a single issuer or counterparty. Concentration of credit risk shall not apply to the obligations of the U.S. Government and Federal Agencies. Concentration limits are outlined in the investment guidelines of each individual portfolio within

domestic fixed income and monitored by the investment managers. RSIC receives annual attestation of the level concentration of credit risk from those managers and has periodic ongoing due diligence calls with them.

CREDIT RISK OF DEBT SECURITIES

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Systems. As a matter of practice, there are no overarching limitations for credit risk exposures within the overall bond portfolio.

Each individual portfolio within bond is managed in accordance with investment guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality.

CUSTODIAL CREDIT RISK - INVESTMENTS

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. Investing for the Systems is governed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310(B) and Title 9 Section 16 of the South Carolina Code of Laws. Funds held in trust for the Systems may be invested and reinvested in a variety of instruments including, but not limited to, fixed income instruments of the United States, foreign fixed income obligations, swaps, forward contracts, futures and options, domestic and international equity securities, private equity, real estate, and fund of funds.

CUSTODIAL CREDIT RISK – DEPOSITS

Custodial credit risk for deposits is the risk that in the event of a bank failure, the Systems' deposits may not be recovered. As prescribed by South Carolina state statute, the South Carolina Public Employee Benefit Authority (PEBA) is the custodian of all deposits and is responsible for securing all deposits held by banks. Deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000; however, amounts in excess of \$250,000 are uninsured and uncollateralized. RSIC has a formal Counterparty Policy, which covers policies and procedures related to oversight and management of Counterparty Risk, including the custodial bank. To monitor custodial credit risk, the credit quality of financial institutions at which deposits are held are periodically reviewed using internal analysis and rating agencies' reports.

EQUITY RISK

Equity risk refers to the financial risk of loss that results from ownership. Equity risk is typically observed using the standard deviation of returns.

FOREIGN CURRENCY RISK

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Systems participate in foreign markets to diversify assets, reduce risk, and enhance returns. Currency forwards are used to manage currency fluctuations and are permitted by investment policy. Policy, however, forbids speculating in forwards and other derivatives.

INTEREST RATE RISK

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment or portfolio. While the RSIC has no formal interest rate risk policy, interest rate risk is observed within the portfolio using effective duration (option adjusted duration), which is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 100 basis point change in interest rates. Effective duration takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. Investment guidelines may specify the degree of interest rate risk taken versus the benchmark within each bond portfolio.

LEVERAGE RISK

Leverage is the use of borrowed capital to increase potential investment returns. While the trust is not allowed to utilize leverage at the total plan level, certain investment vehicles, in particular alternative investment funds, can utilize leverage. The trust itself, however, is not levered at the total plan level, and the total loss exposure to the trust is limited to the capital invested/committed to the investment vehicle.

LIQUIDITY RISK

Liquidity risk is the risk of having limited access to funds, resulting from a lack of market liquidity or restrictions on the sale of ownership interests. The term "liquidity risk" distinguishes a form of market risk, which typically occurs when demand for a given security is weak or the supply of a security is low. Liquidity risk is higher for "private market" investments, such as private equity and real estate funds. While so-called "secondary sales"—privately arranged transfers of interests in these investments—are an increasingly viable option, selling these interests can be subject to restrictions and may require the seller to accept a discount to the investment's valuation. There is no publicly available exchange or marketplace on which to liquidate these ownership interests.

VALUATION RISK

The fair values of alternative investments including private equity, private debt, hedge funds, and real assets for which daily market values are not readily ascertainable are valued in good faith based on the most recent financial information available for the underlying companies and reported by the investment managers at the measurement date, adjusted for subsequent cash flow activities through June 30, 2023. The estimated fair value of these investments may differ from values that would have been used had a liquid public market existed. Valuation of investments is a joint responsibility of PEBA and RSIC. Staff from both offices serve on a joint valuation committee, which oversees and reviews the valuations provided by the custodian and/or the external investment managers.
